

## Write Your Social Media Posts

It's time to write your social media posts! Social media is a great way for friends and family to see your message at once. It's why I post all my best business suit photos to Instagramrrrrram.

Just be sure to play it safe! Don't give any of your personal information on these posts (including last name, email address, or home address), and make sure to run them by an adult.

Below are some examples you can use for the caption of your posts!
